

JASPER THIBODEAUX

GAME PROGRAMMER

Education

Academy Interactive Entertainment, Lafayette, LA Jan. 2020 to June 2023
Advanced Diploma of Professional Game Development in Game Programming 2023
GPA: 3.5

Projects

Hamburger Hell Jan. 2023 to June 2023
This was a fist-person shooter I made with a team of three programmers and artists over five months. It was developed using Unreal Engine 4.27 and used Perforce for source control. I made the bullet, missile, gun UI, and menu UI. I also made controller support for the menus.

Game Art Demo Dec. 2021 to Jan. 2022
Together with a partner, we constructed a third-person demo. We used the Raylib library and C++ language, Git as source control. I made the enemy AI, input, health, collision, and start UI.

Yokai Invasion May 2022 to June 2022
I made a third-person shooter with a team three programmers and artists for three months. The project grew using the Unity engine and used Git for source control. I put in place the enemies, restart menu, and start menus. I assisted with the movement of the ninjas and the player.
